This full-colour title is fully in line with the new separate-subject GCSE physics specifications, including IGCSE. It is appropriate for use throughout the world for GCSE studies. The language level and design have been carefully refined to make the book accessible to students of all abilities. Features to assist preparation for examinations include key topic lists at the start of each chapter, key ideas summaries at the end of each chapter, self-assessment questions throughout the text and sections of longer examination-style questions. A key feature is the extensive use of detailed worked examples that guide students through the concepts, particularly the mathematical ideas. Differentiation is built in via the use of colour-coded extension material for higher achievers. In addition, novel contexts are used to illustrate the concepts; students will find this book appealing and accessible

Make best use of your department's specialist skills with this all-in-one textbook from Hodder Education, designed and organized by an experienced Combined and Coordinated Science syllabus teacher. Providing full coverage for the Cambridge IGCSE Combined and Coordinated Science (0653 and 0654) syllabuses, this single textbook approach makes classroom teaching easier by covering the syllabus content for the three Sciences together in one place. It facilitates a coordinated teaching approach across separate classes, with content organized in line with the syllabus for subject specialists, and provides easy and cost-effective transitioning for students moving from a combined course to a coordinated one where they show clear improvement during their course. - Make classroom teaching easier with a single textbook covering the syllabus content for the three Sciences - Use one textbook across separate classes, with content organized in line with the syllabus for subject specialists - Easy and cost-effective transitioning for students moving between the two levels, with all content covered in one place
