The epic story also told in the film FORD V. FERRARI: By the early 1960s, the Ford Motor Company, built to bring automobile transportation to the masses, was falling behind. Young Henry Ford II, who had taken the reins of his grandfather ' s company with little business experience to speak of, knew he had to do something to shake things up. Baby boomers were taking to the road in droves, looking for speed not safety, style not comfort. Meanwhile, Enzo Ferrari, whose cars epitomized style, lorded it over the European racing scene. He crafted beautiful sports cars, "science fiction on wheels," but was also called "the Assassin" because so many drivers perished while racing them. Go Like Hell tells the remarkable story of how Henry Ford II, with the help of a young visionary named Lee Iacocca and a former racing champion turned engineer, Carroll Shelby, concocted a scheme to reinvent the Ford company. They would enter the high-stakes world of European car racing, where an adventurous few threw safety and sanity to the wind. They would design, build, and race a car that could beat Ferrari at his own game at the most prestigious and brutal race in the world, something no American car had ever done. Go Like Hell transports readers to a risk-filled, glorious time in this brilliant portrait of a rivalry between two industrialists, the cars they built, and the "pilots" who would drive them to victory, or doom.

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

In this book the authors present the current state of both research and technological application of magnesium. In particular, casting and wrought alloys are presented in Chapter 5, followed by a large chapter dedicated to fabrication methods. Corrosion and Protection are treated in Chapter 7. Chapter 8 discusses Engineering Requirements, Strategies and Examples for automobiles in Europe, USA, Asia and Pacific and also for Aerospace and Consumer Articles. Chapter 10 is dedicated to recycling. The experience of authors from seven countries has been combined to produce this book. The book addresses materials researchers as well as design engineers. TOC:Introduction.- History.- Production Technologies.- Physical Metallurgy.- Melting, Alloying and Refining.- Alloys of Practical Importance.- Fabrication Methods.- Corrosion and Surface Protection.- Engineering Requirements, Strategies and Examples.- Recycling.- Data Sheet.

Get the behind the scenes view of arguably the most iconic automotive movie car and scene in history. Ask any automotive enthusiast what his or her favorite chase scene to appear in a movie is, and the majority will respond with "Bullitt." It has made the top 5 in every list covering the best automotive chase scenes in history. But the appeal isn ' t just about the chase scene. Shot entirely on location in picturesque San Francisco in 1968, the movie not only features the historic chase scene but also many outdoor scenes filled with cars and architecture of the period that are filmed in crisp clear color. The movie was the fifth-highest-grossing film for 1968, it was well received by critics, and the chase scene won Franks P. Keller an Oscar for editing. In Bullitt: The Cars and People Behind Steve McQueen, you will get the complete behind the scenes picture of how all the action was coordinated and filmed. Included are the ideas behind the making of the movie, an interview with Director Peter Yates, production stills, and the planning for the scene. Also covered is the cast, the building of the cars used in the film, and the how and why the stunts were choreographed and filmed. To round out the story, an examination of what happened to the cars is included as well as coverage of the multiple Bullitt Edition cars released by Ford after the film, including the latest 2019 edition. While several books have been published about Steve McQueen, the "King of Cool," never before has there been a thorough examination of this specific film and these specific cars. This edition is a welcome addition to the library of any McQueen, Mustang, or automotive film history fan.

On board diagnostics. 1997 model year (UN) Explorer. Related to the Ford Explorer repair manual (Part no. WM312).
