The Bilingual Aphasia Test is a comprehensive language test designed to assess the differential loss or sparing of various language functions in previously bilingual individuals. The individual is tested, separately, in each language he or she

Read Free Assessment Of

previously used,
and then in the two
languages
simultaneously.

The testing is
multimodal --
sampling hearing,
speaking, reading,
and writing; and
multidimensional --
testing various
linguistic levels
(phonological,
morphological,

syntactic, lexical,
and semantic),
tasks

(comprehension,
repetition,
judgment, lexical
access and
propositionizing),
and units (words,
sentences, and
paragraphs). The
BAT is structured
as follows: * To test
a bilingual aphasic,

Read Free

Assessment Of

aphasia. You will need the following testing elements: the stimulus books for each of the languages in which the individual was formerly fluent, the single-language tests for each of these languages, as well as the bilingual test that links them. For

Read Free

Assessment Of

example, if you are testing an English-French bilingual aphasic, you will need an English stimulus book, a French stimulus book, an English single-language test, a French single-language test, and an English-French bilingual test. * The

Read Free Assessment Of

BAT can also be used to test monolingual aphasics. To test for monolingual aphasia, you will need the stimulus book and the single-language test in the language in which the individual was formerly fluent. *
