World History Teaching in Asia is the first broad survey of the content and approaches used to teach world history in secondary schools and colleges in Asia. The collection has been crafted by scholars and educators whose goal was to shed light on the importance of history education and to foster understanding of and between Asian countries. These essays show how the teaching of world history in Asian countries has developed since World War II, with many interesting parallels, including the issue of Eurocentrism, but also distinctive national trends, and considerable changes over time. At a time when many Asian countries are making great strides in education, this study of history education in Asia will be of real interest to educators, history scholars, and policy-makers worldwide.

In this wide-ranging history of modern Britain, Eric Evans surveys every aspect of the period in which Britain was transformed into the world's first industrial power. By the end of the nineteenth century, Britain was still ruled by wealthy landowners, but the world over which they presided had been utterly transformed. It was an era of revolutionary change unparalleled in Britain - yet that change was achieved without political revolution. Ranging across the developing empire, and dealing with such central institutions as the church, education, health, finance and rural and urban life, *The Shaping of Modern Britain* provides an unparalleled account of Britain's rise to superpower status. Particular attention is given to the Great Reform Act of 1832, and the implications of the 1867 Reform Act are assessed. The book discusses: - the growing role of the central state in domestic policy making - the emergence of the Labour party - the Great Depression - the acquisition of a vast territorial empire Comprehensive, informed and engagingly written, *The Shaping of Modern Britain* will be an invaluable introduction for students of this key period of British history.

This book continues the narrative begun by the author in *Wars of Latin America, 1899-1941*. It provides a clear and readable description of military combat occurring in Latin America from 1948 to the start of 1982. (In an unusual peaceful lull, Latin America experienced no wars from 1942 to 1947.) Although the text concentrates on combat narrative, matters of politics, business, and international relations appear as necessary to explain the wars. The author draws on many previously unknown sources to provide information never before published. The book traces the many insurgencies in Latin America as well as conventional wars. Among the highlights are the chapters on the Cuban and Nicaraguan insurrections and on the Bay of Pigs invasion. One goal of the text is to explain why, of the many insurgencies appearing in Latin America, only those in Cuba and Nicaragua were successful in overthrowing governments. The book also helps explain why even unsuccessful insurgencies have survived for decades, as has happened in Colombia and Peru. Instructors considering this book for use in a course may request an examination copy here.

This new volume explores the theory and practice of war and peace in modern historical context. In fifteen clear and concise chapters, this book hits the high and low points of international politics over a two hundred year period, plus a brief foray into the future out to 2025. *War, Peace and International Relations* serves as an excellent introduction to the international history of the past two centuries, showing how those two centuries were shaped and reshaped extensively by war. This book takes a broad view of what was relevant to the causes, courses, and consequences of wars. This upper-level textbook is
