“ A captivating story about family ' s enduring bonds. ” —Publishers Weekly (starred review) “ Another wondrous title from a remarkably talented author. ” —Booklist (starred review) “ A 10 out of 10. Anyone interested in science, sibling relationships, and friendships will enjoy reading We Dream of Space. ” —Time for Kids Newbery Medalist and New York Times – bestselling author Erin Entrada Kelly transports readers to 1986 and introduces them to the unforgettable Cash, Fitch, and Bird Thomas in this pitch-perfect middle grade novel about family, friendship, science, and exploration. A great choice for readers of Kate DiCamillo, Rita Williams-Garcia, and Rebecca Stead. Great for summer reading or anytime! A Today show pick for “ 25 children ' s books your kids and teens won ' t be able to put down this summer!” Cash, Fitch, and Bird Thomas are three siblings in seventh grade together in Park, Delaware. In 1986, as the country waits expectantly for the launch of the Space Shuttle Challenger, they each struggle with their own personal anxieties. Cash, who loves basketball but has a newly broken wrist, is in danger of failing seventh grade for the second time. Fitch spends every afternoon playing Major Havoc at the arcade on Main and wrestles with an explosive temper that he doesn ' t understand. And Bird, his twelve-year-old twin, dreams of being NASA ' s first female shuttle commander, but feels like she ' s disappearing. The Thomas children exist in their own orbits, circling a tense and unpredictable household, with little in common except an enthusiastic science teacher named Ms. Salonga. As the launch of the Challenger approaches, Ms. Salonga gives her students a project—they are separated into spacecraft crews and must create and complete a mission. When the fated day finally arrives, it changes all of their lives and brings them together in unexpected ways. Told in three alternating points of view, We Dream of Space is an unforgettable and thematically rich novel for middle grade readers. We Dream of Space is illustrated throughout by the author.

Which is more dangerous, a gun or a swimming pool? What do schoolteachers and sumo wrestlers have in common? How much do parents really matter? These may not sound like typical questions for an economist to ask. But Steven D. Levitt is not a typical economist. He studies the riddles of everyday life--from cheating and crime to parenting and sports--and reaches conclusions that turn conventional wisdom on its head. Freakonomics is a groundbreaking collaboration between Levitt and Stephen J. Dubner, an award-winning author and journalist. They set out to explore the inner workings of a crack gang, the truth about real estate agents, the secrets of the Ku Klux Klan, and much more. Through forceful storytelling and wry insight, they show that economics is, at root, the study of incentives--how people get what they want or need, especially when other people want or need the same thing.
