For the 20 million women who suffer from painful intercourse: the first book to address the multiple causes and the available treatments. Painful sex is a condition that causes embarrassment and silence -- often going undiscussed or misdiagnosed; as many as 40 percent of women who suffer from it won't seek medical care. And most medical professionals are still in the dark when it comes to women's sexual pain. Now, three leading experts tackle the stereotypes, myths, and realities of sexual pain in this easy-to-understand, accessible guide that will help you get the help you need and deserve. Drs. Goldstein, Pukall, and Goldstein offer answers to your most pressing questions, as well as: Up-to-date information on the more than 20 causes of sexual pain How to choose the right doctor -- and how to interpret your doctor's lingo Valuable tips for understanding sexual pain, and what can be done about it How to rebuild sexual intimacy once the pain is gone Featuring groundbreaking research and stories from women who've also suffered -- and recovered -- When Sex Hurts provides all of the tools you need to stop hurting and start healing.

This is the first edition of a unique new plastics industry resource: Who's Who in Plastics & Polymers. Operating at a high level of fuel efficiency, safety, proliferation-resistance, sustainability and cost, generation IV nuclear reactors promise enhanced features to an energy resource which is already seen as an outstanding source of reliable base load power. The performance and reliability of materials when subjected to the higher neutron doses and extremely corrosive higher temperature environments that will be found in generation IV nuclear reactors are essential areas of study, as key considerations for the successful development of generation IV reactors are suitable structural materials for both in-core and

out-of-core applications. Structural Materials for Generation IV Nuclear Reactors explores the current state-of-the art in these areas. Part One reviews the materials, requirements and challenges in generation IV systems. Part Two presents the core materials with chapters on irradiation resistant austenitic steels, ODS/FM steels and refractory metals amongst others. Part Three looks at out-of-core materials. Structural Materials for Generation IV Nuclear Reactors is an essential reference text for professional scientists, engineers and postgraduate researchers involved in the development of generation IV nuclear reactors. Introduces the higher neutron doses and extremely corrosive higher temperature environments that will be found in generation IV nuclear reactors and implications for structural materials Contains chapters on the key core and out-of-core materials, from steels to advanced micro-laminates Written by an expert in that particular area

This book explores the multifaceted aspects of India's energy security concerns. Bringing together a set of opinions and analysis from experts and policymakers, it sheds light on the context of India's energy insecurity and explores its various dimensions, its nature and extent. Contributors examine the role that trade, foreign and security policy should play in enhancing India's energy security. It is argued that the key challenge for India is to increase economic growth while at the same time keeping energy demands low. This is especially challenging with the transition from biomass to fossil fuels, the growth of motorized private transport, and rising incomes, aspirations and changing lifestyles. The book suggests that at this time there are strong arguments to lessen the fossil fuel path dependence and it argues for a need to engage with all the key sources of this dependence to implement a process of energy change. India's Energy Security is a timely contribution given the national and international interest in the issue of energy security and the possibility that energy concerns have the potential of becoming the cause of serious international conflicts. It will be of interest to academics and policy makers working in the field of Asian Studies, Energy Policy, International Relations and Security Studies.

Traces the development of the 1996 Ford Taurus, and describes the interactions between designers, engineers, marketers, accountants, and manufacturing staff

"Stern but compassionate, author Wendell Berry raises broader issues that environmentalists rarely focus on . . . In one sense Berry is the voice of a rural agrarian tradition that stretches from rural Kentucky back to the origins of human civilization. But his insights are universal because Our Only World is filled with beautiful, compassionate writing and careful, profound thinking."—Associated Press  
The planet's environmental problems respect no national boundaries. From soil erosion and population displacement to climate change and failed energy policies, American governing classes are paid by

corporations to pretend that debate is the only democratic necessity and that solutions are capable of withstanding endless delay. Late Capitalism goes about its business of finishing off the planet. And we citizens are left with a shell of what was once proudly described as The American Dream. In this collection of eleven essays, Berry confronts head-on the necessity of clear thinking and direct action. Never one to ignore the present challenge, he understands that only clearly stated questions support the understanding their answers require. For more than fifty years we've had no better spokesman and no more eloquent advocate for the planet, for our families, and for the future of our children and ourselves.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt
