Describes a method of negotiation that isolates problems, focuses on interests, creates new options, and uses objective criteria to help two parties reach an agreement

For years, academic thinking on negotiations and auctions has matured in different silos. Negotiation theory focused on deals between two parties, investigating psychological motivations and invoking ideas like 'best alternative to a negotiated agreement.' Auction theory, on the other hand, focused exclusively on situations where multiple bidders were involved and the highest bidder won. Harvard Business School professor Guhan Subramanian specializes in understanding how deals. As he studied deals in the news, observed deals as a participant and invited legendary dealmakers into his classroom, one commonality kept cropping up. Assets most often change hand not in a pure negotiation or a pure auction, but by a mechanism that freely combines elements from both schools of thought. Negotiators are 'fighting on two fronts' across the table, but also on the same side of the table with known, unknown, or possible competitors. In Negotiauctions, Subramanian provides a lively tour of both negotiation and auction theory, following those summaries with an in-depth look at his hybrid theory that includes strategies that readers can use in real life situations. Along the way Subramanian employs multiple case studies, from studio negotiations over a new season of the TV show Frasier to his own experience purchasing a car. Classroom tested in one of the world's best business schools, Negotiauctions is an indispensable how-to guide for anyone involved in the sale of high-value assets.

A member of the world renowned Program on Negotiation at Harvard Law School introduces the powerful next-generation approach to negotiation. A member of the world-renowned Program on Negotiation at Harvard Law School introduces the powerful next-generation approach to negotiation. For many years, two approaches to negotiation have prevailed: the [win-win] method exemplified in Getting to Yes by Roger Fisher, William Ury, and Bruce Patton; and the hard-bargaining style of Herb Cohen's You Can Negotiate Anything. Now award-winning Harvard Business School professor Michael Wheeler provides a dynamic alternative to one-size-fits-all strategies that don't match real world realities. The Art of Negotiation shows how master negotiators thrive in the face of chaos and uncertainty. They don't trap themselves with rigid plans. Instead they understand negotiation as a process of exploration that demands ongoing learning, adapting, and influencing. Their agility enables them to reach agreement when others would be stalemated. Michael Wheeler illuminates the improvisational nature of negotiation, drawing on his own research and his work with Program on Negotiation colleagues. He explains how the best practices of diplomats such as George J. Mitchell, dealmaker Bruce Wasserstein, and Hollywood producer Jerry Weintraub apply to everyday transactions like selling a house, buying a car, or landing a new contract. Wheeler also draws lessons on agility and creativity from fields like jazz, sports, theater, and even military science.

When discussing being stuck in a "win-win vs. win-lose" debate, most negotiation books focus on face-to-face tactics. Yet, table tactics are only the "first dimension" of David A. Lax and James K. Sebenius' pathbreaking 3-D Negotiation (TM) approach, developed from their decades of doing deals and analyzing great dealmakers. Moves in their "second dimension" [deal design] systematically unlock economic and noneconomic value by creatively structuring agreements. But what sets the 3-D approach apart is its "third dimension": setup. Before showing up at a bargaining session, 3-D Negotiators ensure that the right parties have been approached, in the right sequence, to address the right interests, under the right expectations, and facing the right consequences of walking away if there is no deal. This new arsenal of moves away from the table often has the greatest impact on the negotiated outcome. Packed with practical steps and cases, 3-D Negotiation demonstrates how superior setup moves plus insightful deal designs can enable you to reach remarkable agreements at the table, unattainable by standard tactics.

In today's global business environment, an executive must have the skills and knowledge to navigate all stages of an international deal, from negotiations to managing the deal after it is signed. The aim of The Global Negotiator is to equip business executives with that exact knowledge. Whereas most books on negotiation end when the deal is made, Jeswald W. Salacuse will guide the reader from the first handshake with a potential foreign partner to the intricacies of making the international joint venture succeed and prosper, or should things go poorly, how to deal with getting out of a deal gone wrong. Salacuse illustrates the many ways in which an international deal may falter and the methods parties can use to save it, provides the necessary technical knowledge to structure specific business transactions, and explores the transformations to the international business landscape over the last decade.

Conflict is inevitable, in both deals and disputes. Yet when clients call in the lawyers to haggle over who gets how much of the pie, traditional hard-bargaining tactics can lead to ruin. Too often, deals blow up, cases don't settle, relationships fall apart, justice is delayed. Beyond Winning charts a way out of our current crisis of confidence in the legal system. It offers a fresh look at negotiation, aimed at helping lawyers turn disputes into deals, and deals into better deals, through practical, tough-minded problem-solving techniques.
