"Fighting Scholars" offers the first book-length overview of the ethnographic study of martial arts and combat sports. The book's main claim is that such activities represent privileged grounds to access different social dimensions, such as emotion, violence, pain, gender, ethnicity and religion. In order to explore these dimensions, the concept of 'habitus' is presented prominently as an epistemic remedy for the academic distant gaze of the effaced academic body. The book's most innovative features are its empirical focus and theoretical orientation. While ethnographic research is a widespread and popular approach within the social sciences, combat sports and martial arts have yet to be sufficiently interrogated from an ethnographic standpoint. The different contributions of this volume are aligned within the same project that began to crystallize in Loïc Wacquant's 'Body and Soul': the construction of a "carnal sociology" that constitutes an exploration of the social world 'from' the body.

Robotics is envisioned as a field that will make human life easier and better. Part of that vision includes taking care of the sick, injured, and disabled. Caregiving robots are already on the job in some places. From monitoring a person's health to fetching items and cleaning homes to providing companionship, robots are improving people's lives. Readers will discover all the ways that robots can assist when special help is needed. A hands-on activity helps students learn more about science and supports the NGSS K-2 Engineering Design Standards.

As a final installment in a military career wrought with horrid events, Jess is sent to rescue a Braugh warrior and his men from prison. All she wants is to be safely on her home planet to forget her throwback status and find a normal existence. The warrior's intimidating size and raw strength contrast with his tender nature, skillful lips and gentle touch, awakening sexual urges she thought had been stripped away years prior. Shane knows the piercings adorning Jess' body once created pain and taught her to suppress arousal and desire. And he knows what's needed to take her beyond the torture. But providing a sexual release may prove easier than convincing her something stronger lies between them. All he needs to claim his angel, in every way, is her consent.

Biorhythms are the rhythms of life within us all. The book and wheel should help the reader to understand himself and others better. Each cycle - physical, emotional and intellectual - begins on the day you are born and rises and falls in positive and negative phases throughout your life.

Thielicke here studies the themes of doubt and appropriation in modern Protestant thought. A leading advocate of dialectical theology, Thielicke examines the work of the great German Protestant religious philosophers from Lessing and Schliermacher through Barth and Tillich, probing these theologians' understanding of their context and how this tradition can impact our own engagement with our times. Clear, finely nuanced, historically and philosophically mature, this is a vital reflection on the history of theology and in systematic theology.

From sixteenth-century cabinets of wonders to contemporary animal art, The Breathless Zoo: Taxidermy and the Cultures of Longing examines the cultural and poetic history of preserving animals in lively postures. But why would anyone want to preserve an animal, and what is this animal-thing now? Rachel Poliquin suggests that taxidermy is entwined with the enduring human longing to find meaning with and within the natural world. Her study draws out the longings at the heart of taxidermy—the longing for wonder, beauty, spectacle, order, narrative, allegory, and remembrance. In so doing, *The Breathless Zoo* explores the animal spectacles desired by particular communities, human assumptions of superiority, the yearnings for hidden truths within animal form, and the loneliness and longing that haunt our strange human existence, being both within and apart from nature.

Since the Cultural Revolution, data have been uncovered to illuminate that tumultuous decade. In this volume 13 scholars examine the gap between the ideology of the Revolution and the harsh and contradictory reality of its outcome. They focus particularly on the violence, coercion, and constant tension between the need for centralization to enforce policies and the need for decentralizing decision-making if those goals were to be achieved.

Alice Fulton, the judge for the 1998 Walt Whitman Award, calls *Once I Gazed at You in Wonder* "quite simply, the most endearing book I've read in some time." Readers of this audacious and, yes, endearing collection will agree. Jan Heller Levi has said that her poems are not confessions but conversations. Here, then, are her conversations with the world. What sets Levi apart, however, is that she lets the world answer back. Difficult fathers, ineffectual mothers are forgiven; ex-lovers are blessed. Sophisticated but never jaded, this poet looks in wonder beyond the self: a cup of coffee in one of New York's ubiquitous Greek diners can launch Levi into a meditation on truth versus compassion; a suite of elegies for her mother takes us from a hospital corridor to the studio of a television talk show where God is the guest; a poetry reading in which she shares the stage with a folk singer illustrates Levi's gift for illuminating the absurd textures of late-twentieth-century existence. Don't you have any happy poems? he wondered. Don't you have any cancer songs? I asked. With the narrative drive of great fiction, the consolations of philosophy, and the rigor of art, *Once I Gazed at You in Wonder* marks the entrance of a much-needed new voice and vision in the conversation that is American poetry.
