Nearly two decades after Rwanda's horrific genocide, the country has been transformed. High rises are going up in the capital city of Kigali; a newly established stock exchange is attracting investors; and the economy is transitioning from subsistence agriculture to information and communication technology. In pursuit of the alchemy that made Rwanda such an unlikely success story, Patricia Crisafulli and Andrea Redmond interviewed Rwandan government officials, including

Rwanda, Inc. How a Devastated Nation Became an Economic Model for the Developing World By: Patricia Crisafulli , Andrea Redmond

Eighteen years after the genocide that made Rwanda international news, but left it all but abandoned by the West, the country has achieved a miraculous turnaround. Rising out of the complete devastation of a failed state, Rwanda has emerged on the world stage yet again-this time with a unique model for governance and economic development under the leadership of its strong and decisive president, Paul Kagame.

Here, Patricia Crisafulli & Andrea Redmond look at Kagame's leadership, his drive for excellence and execution that draws comparisons to an American CEO and emphasizes the development of a sophisticated and competitive workforce that leverages human capital. In Rwanda, the ultimate turnaround, strong and effective leadership has made a measurable and meaningful difference. Rwanda's progress offers an example for other developing nations to lift themselves out of poverty without heavy reliance on foreign aid through decentralization, accountability, self-determination, and self-sufficiency. The authors also explore Rwanda's journey toward its goal of becoming a middle-income nation with a technology-based economy, and its progress to encourage private sector development and foster entrepreneurship, while also making gains in education, healthcare, and food security—and all with a strong underpinning of reconciliation and unification. As so many nations stand on the brink of political and economic revolution, this is a timely and fascinating look at the implications of Rwanda's success for the rest of the continent—and the world.

An analysis of how African president Paul Kagame's economic and social reforms significantly improved a genocide-torn Rwanda and how his examples can provide a beneficial model for other struggling

democracies includes coverage of the nation's goals on education. 30,000 first printing.

In 1994, ethnic conflict turned to genocide in Rwanda. When the world finally took notice, a million people lay dead, and the small African country lay in ruins. Rwanda returned from the brink guided by rulers determined to rebuild the country on their own terms, rather than those of a previously indifferent international community. Paul Kagame, Rwanda's first democratically elected president, embodies the new Rwandan political philosophy. Young, unconventional, not without flaws and critics—Kagame is key to understanding Rwanda's transition from a country that had known only fear, division and clan-based nepotism for many years to an exceptional African state built upon traditional order and values. Paul Kagame's life—from exiled child refugee, to guerilla warrior and rebel politician, to President of Rwanda—is traced in this exploration of the influences on Rwanda's struggle for change. Analyzing the conflicts and challenges of post-genocide Rwanda in comparison to modern parallels, the work invites reassessment of Kagame's leadership and government in an African context rather than measurement against Western standards, and critiques Western involvement in Rwanda since the early 1990s. Twenty-eight photographs and three maps supplement the text, as do a history

of Rwanda's Banyarwanda people and a glossary of words in Kinyarwanda, their language. The work includes a bibliography and an index.

A behind-the-scenes look at Wall Street's top banker Jamie Dimon is Wall Street's biggest player. Following the 11th-hour rescue of Bear Stearns by JP Morgan, his profile has reached stratospheric levels. The House of Dimon goes behind the scenes to recount the amazing events that shaped Dimon's career, including his rise to prominence as Sandy Weill's protégé at Citigroup, only to be fired and denied the top spot; his orchestration of the JP Morgan acquisition of BankOne, a deal that brought Dimon back to Wall Street as CEO of JP Morgan; and the drama surrounding the purchase of Bear Stearns and Washington Mutual—two opportunistic deals that helped avert government bailouts. Lively and engaging, the book provides insider accounts of how Dimon successfully integrated acquired companies; reorganized underperforming units; created efficiencies; and grew bottom-line results as the consummate hands-on manager. Through interviews with Dimon, Weill, JP Morgan board members, and people who worked with Dimon, readers will gain insight into Dimon's management style and his ability to inspire outstanding performance. Most importantly, the book explains Dimon in the context of contemporary Wall Street, an environment that has destroyed several top CEOs and led to the demise

of several major financial institutions. Dimon has flourished by avoiding alluring, but potentially catastrophic risks and taking advantage of strategic opportunities. During one of the most difficult and tumultuous periods in Wall Street history, he has survived and thrived. The House of Dimon shows how he's done it and explores what lies ahead for Dimon, as he attempts to grow JP Morgan in the face of the unrelenting pressures of Wall Street. The life story of one-time revolutionary Paul Kagame describes how he returned from exile to lead a modern-day coup, rose to the position of president of the devastated country of Rwanda, and has led an effective and ambitious campaign to stabilize and revive his once shattered nation. first-hand account of the genocide by the man who led the UN mission. Digging deep into shattering memories, General Dallaire has written a powerful story of betrayal, naïveté, racism and international politics. His message is simple and undeniable: “Never again.” When Lt-Gen. Roméo Dallaire received the call to serve as force commander of the UN intervention in Rwanda in 1993, he thought he was heading off on a modest and straightforward peacekeeping mission. Thirteen months later he flew home from Africa, broken, disillusioned and suicidal, having witnessed the slaughter of 800,000 Rwandans in only a hundred days. In *Shake Hands with the Devil*, he takes the reader with him on a return voyage into the hell of Rwanda, vividly recreating the events the international community turned its back on. This book is an unsparing eyewitness account of the failure by humanity to stop the genocide, despite timely warnings. Woven through the story of this disastrous mission is Dallaire’s own journey from confident Cold Warrior, to devastated UN commander, to retired general engaged in a painful struggle to find a measure of peace, reconciliation and hope. This book is General Dallaire’s personal account of his conversion from a man certain of his worth and secure in his assumptions to a man conscious of his own weaknesses and failures and critical of the institutions he’d relied on. It might not sit easily with standard ideas of military leadership, but understanding what happened to

General Dallaire and his mission to Rwanda is crucial to understanding the moral minefields our peacekeepers are forced to negotiate when we ask them to step into the world's dirty wars. Excerpt from Shake Hands with the Devil My story is not a strictly military account nor a clinical, academic study of the breakdown of Rwanda. It is not a simplistic indictment of the many failures of the UN as a force for peace in the world. It is not a story of heroes and villains, although such a work could easily be written. This book is a cri de coeur for the slaughtered thousands, a tribute to the souls hacked apart by machetes because of their supposed difference from those who sought to hang on to power. . . . This book is the account of a few humans who were entrusted with the role of helping others taste the fruits of peace. Instead, we watched as the devil took control of paradise on earth and fed on the blood of the people we were supposed to protect.

Bill Gates, Bill Clinton, Tony Blair, Ben Affleck, Natalie Portman, the CEOs of Starbucks and Visa, Howard G. Buffett, Robert de Niro, Susan Rice, Don Cheadle, and many other celebrities are amongst his most fervent admirers. For them, Paul Kagame is the man who produced the Rwandan Miracle. The one who was able to make a people and a nation rise from the ashes of the last genocide of the twentieth century. But this former refugee, once a warlord by necessity, who

then became the president of a country that he endeavors to lead down the path of economic emergence with an iron hand, also has fierce enemies who consider him to be a sort of African Machiavelli. His opponents, human rights organizations in particular, criticize him for favoring development over democracy. Saint or demon, virtuous liberator or dictator: rarely has a head of state been as controversial as he. Twenty years after the genocide of the Tutsis from Rwanda, causing one million deaths in one hundred days in the Land of a Thousand Hills, Paul Kagame candidly reveals himself for the very first time. François Soudan is the managing editor of Jeune Afrique, a leading news weekly based in Paris, and has authored biographies of Nelson Mandela and Muammar el-Qaddafi. Soudan has traveled to Rwanda on numerous occasions over the past twenty years. His interviews with Paul Kagame took place in Kigali between December 2013 and March 2014.

"To make the effort to understand what happened in Rwanda is a painful task that we have no right to shirk—it is part of being a moral adult." -Susan Sontag In the late 1990s, French author and journalist Jean Hatzfeld made several journeys into the hilly, marshy region of the Bugesera, one of the areas most devastated by the Rwandan genocide of April 1994, where an average of five out of six Tutsis were hacked

# File Type PDF Rwanda Inc How A Devastated Nation Became An Economic Model For The Developing World

to death with machete and spear by their Hutu neighbors and militiamen. In the villages of Nyamata and N'tarama, Hatzfeld interviewed fourteen survivors of the genocide, from orphan teenage farmers to the local social worker. For years the survivors had lived in a muteness as enigmatic as the silence of those who survived the Nazi concentration camps. In *Life Laid Bare*, they speak for those who are no longer alive to speak for themselves; they tell of the deaths of family and friends in the churches and marshes to which they fled, and they attempt to account for the reasons behind the Tutsi extermination. For many of the survivors "life has broken down," while for others, it has "stopped," and still others say that it "absolutely must go on." These horrific accounts of life at the very edge contrast with Hatzfeld's own sensitive and vivid descriptions of Rwanda's villages and countryside in peacetime. These voices of courage and resilience exemplify the indomitable human spirit, and they remind us of our own moral responsibility to bear witness to these atrocities and to never forget what can come to pass again. Winner of the Prix France Culture and the Prix Pierre Mille, *Life Laid Bare* allows us, in the author's own words, "to draw as close as we can get to the Rwandan genocide."

In 1949, Rosamond Halsey Carr, a young fashion illustrator living in

New York City, accompanied her dashing hunter-explorer husband to what was then the Belgian Congo. When the marriage fell apart, she decided to stay on in neighboring Rwanda, as the manager of a flower plantation. Land of a Thousand Hills is Carr's thrilling memoir of her life in Rwanda—a love affair with a country and a people that has spanned half a century. During those years, she has experienced everything from stalking leopards to rampaging elephants, drought, the mysterious murder of her friend Dian Fossey, and near-bankruptcy. She has chugged up the Congo River on a paddle-wheel steamboat, been serenaded by pygmies, and witnessed firsthand the collapse of colonialism. Following 1994's Hutu-Tutsi genocide, Carr turned her plantation into a shelter for the lost and orphaned children—work she continues to this day, at the age of eighty-seven.

Young people are transforming the global landscape. As the human population today is younger and more urban than ever before, prospects for achieving adulthood dwindle while urban migration soars. Devastated by genocide, hailed as a spectacular success, and critiqued for its human rights record, the Central African nation of Rwanda provides a compelling setting for grasping new challenges to the world's youth. Spotlighting failed masculinity, urban desperation, and forceful governance, Marc Sommers tells the dramatic story of young Rwandans

# File Type PDF Rwanda Inc How A Devastated Nation Became An Economic Model For The Developing World

who are “stuck,” striving against near-impossible odds to become adults. In Rwandan culture, female youth must wait, often in vain, for male youth to build a house before they can marry. Only then can male and female youth gain acceptance as adults. However, Rwanda's severe housing crisis means that most male youth are on a treadmill toward failure, unable to build their house yet having no choice but to try. What follows is too often tragic. Rural youth face a future as failed adults, while many who migrate to the capital fail to secure a stable life and turn fatalistic about contracting HIV/AIDS. Featuring insightful interviews with youth, adults, and government officials, Stuck tells the story of an ambitious, controlling government trying to govern an exceptionally young and poor population in a densely populated and rapidly urbanizing country. This pioneering book sheds new light on the struggle to come of age and suggests new pathways toward the attainment of security, development, and coexistence in Africa and beyond.
