A boy's nomadic life in Mongolia is under threat in a novel that "captures the mountains, valleys and steppes in all their surpassing beauty and brutality"

(Minneapolis Star-Tribune). In the high Altai Mountains of northern Mongolia, a young shepherd boy comes of age, tending his family's flocks on the mountain steppes and knowing little of the world beyond the surrounding peaks. But his nomadic way of life is increasingly disrupted by modernity. This confrontation comes in stages. First, his older siblings leave the family yurt to attend a distant boarding school. Then the boy's grandmother dies,

and with her his connection to the old ways. But perhaps the greatest tragedy strikes when his dog, Arsylang—"all that was left to me"—ingests poison set out by the boy's father to protect his herd from wolves. "Why is it so?" Dshurukawaa cries out in despair to the Heavenly Blue Sky, to be answered only by the wind.

Rooted in the oral traditions of the Tuvan people, *The Blue Sky* weaves the timeless story of a boy poised on the cusp of manhood with the story of a people on the threshold.

In *Blue Sky Dream: A Memoir of America's Fall from Grace*, award-winner David Beers offers a powerful, personal vision of the rise and fall of the American middle class. Here is a dazzling literary chronicle of a family, a people, and a nation: the "blue sky tribe" of ever-optimistic middle-class Americans who believed in something called the American Dream, then woke up one day to discover it was gone. *Blue Sky Dream* is a book

incredibly rich in ideas, in ways of seeing the recent past with stunning clarity. David Beers explores issues that define our times—downsizing, middle-class anxiety, the profound anger with government, the sense that something has gone awry with the United States—with such skill, personal immediacy, and compassion that readers will see their own histories in his prose. *Blue Sky Dream* can rightly be called a communal memoir, because in telling his family's tale—growing tensions and disillusionment in their suburban paradise, a son rejecting his parents' values, one sudden and inexplicable moment of violence—Beers tells the story of his people, the blue sky tribe

Tim Burton's latest motion picture, *Dumbo*, elegantly answers the question left at the end of Disney's animated film: What would the world do, if an elephant could fly? Burton is known for creating fantasy worlds, or fantastical real worlds, that are visually stunning and full of trademark characteristics: gothic sensibilities, spirals, stripes, bold colors, and elongated and exaggerated aesthetics. He populates them with unique and distinctive

characters who are large-eyed and taper-limbed and often visibly different in some way. His films are quirky, humorous, emotional, and sympathetic to those who don't fit the definition of normal. Every single one is a celebration of individuality, and Burton's *Dumbo* is no exception. In *The Art and Making of Dumbo*, author and longtime Burton collaborator Leah Gallo, after first setting the stage with a thoughtful history on Disney's 1941 animated classic, shares a detailed account of how Burton and his talented team reimaged this tale into a magical new film. Through interviews with the cast and crew, a breathtaking collection of art and photography, and a stylish design by fellow

Burton collaborator Holly Kempf, this book is an appreciation of the dozens of departments and thousands of people who overlapped, interacted, and collaborated to bring to life the story of a flying elephant and the humans who wanted to exploit him along with those who loved and helped him. Dumbo's story development, location scouting, casting, costuming, set design, special effects, music, and more are vividly presented here in a true celebration of heart and imagination.

string, the start of a lifelong obsession with aviation. He was to spend the next four years in the deadly cut-and-thrust of aerial dogfights over France and Italy, collecting a chestful of medals, and a reputation as one of the Great War's leading aces. He would hone his skills in an array of aircraft – the BE2, the 11/2-Strutter, the Camel – and as the war reaches its climax, Dicken is maturing into a daring pilot. But then he must undergo one final test in order to emerge victorious. And with his life intact...
