Put simply, the subtitle of 'War, Deceit, Imperial Folly and the making of the modern Middle East' is a far more apt designation for Scott Anderson's work. Anderson gives the reader an intriguing cast of characters, whose stories are told through an almost fiction-like narrative from the perspective of four main players, with a 'supporting cast' filling in the blanks to make for a compelling historical account.

A distinguished Oxford historian presents an absorbing study of the main personalities and the influences that molded the history of Western Europe from the late tenth to the early thirteenth century, describing the chief forms of social, political, and religious organization. "A book of rare value."--Sidney Painter, American Historical Review

The Mediterranean has been for millennia one of the global cockpits of human endeavour. World-class interpretations exist of its Classical and subsequent history, but there has been remarkably little holistic exploration of how its societies, culture and economies first came into being, despite the fact that almost all the fundamental developments originated well before 500 bc. This book is the first full, interpretive synthesis for a generation on the rise of the Mediterranean world from its beginning, before the emergence of our own species, up to the threshold of Classical times. Extensively illustrated and ranging across disciplines, subject matter and chronology from early humans and the origins of farming and metallurgy to the rise of civilizations - Egyptian, Levantine, Hispanic, Minoan, Mycenaean, Phoenician, Etruscan, early Greek - the book is a masterpiece of archaeological and historical writing.

The contributors question the current academic understanding of what is known as the global middle class. They see middle-class formation as transnational and they examine this group through the lenses of economics, gender, race, and religion from the mid-nineteenth century to today.

A study of the chief personalities and forces that brought Western Europe to pre-eminence as a centre for political experimentation, economic expansion, and intellectual discovery.

Liverpool was founded in the Middle Ages, and as the city approaches its eight-hundredth anniversary, this book takes stock of Liverpool's scholarly contributions to modern understanding of the period. From the eighteenth century to the twenty-first, scholars from Liverpool have made pioneering advances in fields as diverse as Celtic philology and manuscript collecting. By focusing on a local perspective, this volume presents a microcosmic view of the different building blocks of the modern construction of the Middle Ages while offering fresh insights into more universal elements of medieval culture such as pageantry and mystery plays.

Periods of time characterized by large scale social change encourage reinterpretations of the meanings of categories like race and class, strategies for their reproduction, and their relationship to one another as social structures. The racialized nature of class identities makes movements which attempt to redistribute class resources along racial lines a challenge to both racial boundaries and class boundaries, highlighting their intersection through the strategies and resources associated with social reproduction.

This is the first systematic literary study of one of the masterpieces of classical Arabic literature, the fourth/tenth century Kitāb al-aghānī (The Book of Songs) by Abū I-Faraj al-Isbahānī. Until now the twenty-four volume Book of Songs has been regarded as a rather chaotic but priceless mine of information about classical Arabic music, literature and culture. This book approaches it as a work of literature in its own right, with its own internal logic and coherence. The study also consistently integrates the musical component into the analysis and proposes a reading of the work in which individual anecdotes and poems are related to the wider context, enhancing their meaning.

Presents an in-depth look at Tolkien's source materials for Middle-Earth, which was inspired by elements from mythology, poetry, archaeology, art, and literature, and looks at the author's impact on modern culture.

Before the 1760s -- with the major exception of Chaucer -- nearly all of Middle English literature lay undiscovered and ignored. Because established scholars regarded later medieval literature as primitive and barbaric, the study of this rich literary heritage was relegated to antiquarians and dilettantes. In The Making of Middle English, 1765-1910, David Matthews chronicles the gradual rediscovery of this literature and the formation of Middle English as a scholarly pursuit. Matthews details how the careers, class positions, and ambitions of only a few men gave shape and direction to the discipline. Mostly from the lower middle class, they worked in the church or in law and hoped to exploit medieval literature for financial success and social advancement. Where Middle English was concerned, Matthews notes, these scholars were self-taught, and their amateurism came at the price of inaccurately edited and often deliberately "improved" texts intended for a general public that sought appealing, rather than authentic, reading material. This study emphasizes the material history of the discipline, examining individual books and analyzing introductions, notes, glossaries, promotional materials, lists of subscribers, and owners' annotations to assess the changing methodological approaches of the scholars and the shifts in readership. Matthews explores the influence of aristocratic patronage and the societies formed to further the editing and publication of texts. And he examines the ideological uses of Middle English and the often contentious debates between these scholars and organizations about the definition of Englishness itself. A thorough work of scholarship, The Making of MiddleEnglish presents for the first time a detailed account of the formative phase of Middle English studies and provides new perspectives on the emergence of medieval studies, canon formation, the politics of editing, and the history of the book.
