The fully revised second edition of this textbook offers a comprehensive introduction to theories of public policy and policymaking. The policy process is complex: it contains hundreds of people and organisations from various levels and types of government, from agencies, quasi- and non-governmental organisations, interest groups and the private and voluntary sectors. This book sets out the major concepts and theories that are vital for making sense of the complexity of public policy, and explores how to combine their insights when seeking to explain the policy process. While a wide range of topics are covered – from multi-level governance and punctuated equilibrium theory to 'Multiple Streams' analysis and feminist institutionalism – this engaging text draws out the common themes among the variety of studies considered and tackles three key questions: what is the story of each theory (or multiple theories); what does policy theory tell us about issues like 'evidence based policymaking'; and how 'universal' are policy theories designed in the Global North? This book is the perfect companion for undergraduate and postgraduate students studying public policy, whether focussed on theory, analysis or the policy process, and it is essential reading for all those on MPP or MPM programmes. New to this Edition: - New sections on power, feminist institutionalism, the institutional analysis and development framework, the narrative policy framework, social construction and policy design - A consideration of policy studies in relation to the Global South in an updated concluding chapter - More coverage of policy formulation and tools, the psychology of policymaking and complexity theory - Engaging discussions of punctuated equilibrium, the advocacy coalition framework and multiple streams analysis

Thoroughly revised, reorganized, updated, and expanded, this widely-used text sets the balance and fills the gap between theory and practice in public policy studies. In a clear, conversational style, the author conveys the best current thinking on the policy process with an emphasis on accessibility and synthesis rather than novelty or abstraction. A newly added chapter surveys the social, economic, and demographic trends that are transforming the policy environment.

In his eye-opening work, Dye explodes the myth that public policy represents the "demands of the people" and that the making of public policy flows upward from the masses. In reality, Dye argues, public policy in America, as in all nations, reflects the values, interests, and preferences of a governing elite. Top Down Policymaking is a close examination of the process by which the nation's elite goes about the task of making public policy. Focusing on the behind-the-scenes activities of money foundations, policy planning organizations, think tanks, political campaign contributors, special-interest groups, lobbyists, law firms, influence-peddlers, and the national news media, Dye concludes that public policy is made from the top down.

Public Policymaking Reexamined is now recognized as a fundamental treatise for public policy studies. Although it caused much controversy when it was first published for its systematic approach to policy studies, the book is acknowledged as a modern classic of continuing importance for the teaching and research of public policy, planning and policy analysis, and public administration. The paperback includes a new introduction updating and supplementing many of the author's original ideas. Professor Dror combines the approaches of policy analysis, behavioral science, and systems analysis in his examination of the reality of public policymaking and his suggestions for its reform. Actual policymaking is carefully evaluated with the help of explicit criteria and standards based on an optimal model approach, resulting in detailed proposals for improvement. He applies a scientific orientation to the study of social facts and theory.
