This state-of-the-science reference and text has given thousands of practitioners and students a strong foundation in understanding and treating addictive disorders. Leading experts address the neurobiology of addictions and review best practices in assessment and diagnosis. Specific substances of abuse are examined in detail, with attention to real-world clinical considerations. Issues in working with particular populations—including polysubstance abusers, culturally diverse patients, older adults, chronic pain sufferers, and others—are explored. Chapters summarize the theoretical and empirical underpinnings of widely used psychosocial and pharmacological treatments and clearly describe clinical techniques. New to This Edition *Incorporates a decade's worth of major advances in research and clinical practice. *Updated for DSM-5. *Many new authors; extensively revised with the latest information on specific biological mechanisms, substances, populations, and treatments. *Chapter on motivational interviewing.

Featuring contributions by an international team of the world's experts in urology and gynecology, this fourth edition reinforces its status as the classic comprehensive resource on female urology and urogynecology and an essential clinical reference in the field.

This fourth edition continues to provide a link between occupational health and clinical practice. It covers target organ systems that can be affected by hazardous exposures in workplaces, and it focuses on the clinical presentations, investigations and management of affected individuals. We have retained consideration of some special issues relevant to occupational medicine practice in this new edition. The main emphasis continues to be prevention of disease and early detection of health effects. This edition of the book has been updated to include new materials, topics, and references. We have retained a few of the previous case studies and illustrations, and introduced several new ones. There are new chapters on audit and evidence-based practice and on occupational cancer. We trust that this edition addresses many of the recommendations that were provided by readers of the previous edition. We have again asked international experts to author many of the chapters. Some of the authors are from Asia, and others from the US, UK, the Middle East and Australia. All the authors will have either clinical or academic experience in occupational medicine practice. The book will be of interest to medical practitioners, especially those in primary care and doctors intending to pursue a career in occupational medicine. It would also be relevant for non-medical health and safety professionals wanting to know more about health effects resulting from occupational exposures. Other groups who may find this edition useful as a ready reference are medical students, occupational health nurses, or clinical specialists in fields such as dermatology, respiratory medicine or toxicology. The book is targeted at all those who are interested in the interaction between work and health, and how occupational diseases and work-related disorders may present. Contents: Clinical Occupational Medicine: Work and Health (David Koh and Aw Tar Ching) Diagnosis and Management of Occupational Diseases (Aw Tar Ching, David Koh and John P Thompson) Respiratory Disorders (David Fishwick and Chris Barber) Skin Disorders (David Koh and Goh Chee Leok) Mental Health Disorders (Ken Addley and Robert Kerr) Musculoskeletal Disorders (Keith Palmer, Jane Frølund Thomsen and Sigurd Mikkelsen) Auditory Disorders (Ailin Razali and Krishna Gopal Rampal) Hematological Disorders (Ng Wee Tong and Mark Newson-Smith) Neurological Disorders (Ian Brown and Arjune Sen) Occupational Infections (Rayhan Hashmey and Aw Tar Ching) Renal Disorders (Huw Rees, Doris T Chan and Steve Riley) Cardiovascular Disorders (Mikhail S Dzeshka, Eduard Shantsila and Gregory Y H Lip) Hepatobiliary and Gastrointestinal Disorders (Ian Brown and Jane Collier) Eye Injuries and Other Disorders (Laurence Lim Shen and Wong Tien Yin) Metabolic Disorders (Tng Eng Loon and Lee See Muah) Reproductive Disorders (Lim John Wah and David Koh) Occupational Cancers (Lin Fritschi and Alison Reid) Special Issues in Occupational Medicine: Ethics in Occupational Medicine (David Koh and Lee See Muah) Occupational Medicine Practice and the Law (Lee See Muah and David Koh) Audit and Evidence-Based Occupational Medicine Practice (Yue-liang Leon Guo) Health Screening and Periodic Medical Examinations (Aw Tar Ching and David Koh) Aviation Medicine (Brian See and Gan Wee Hoe) Diving Medicine (Gregory Chan Chung Tsing) Remote Health Care (John Nelson Norman) Medical Disasters Planning and Response (Halim Mohamed and Abu Hasan Samad) Communication in Occupational Medicine (Max Lum) Cultural Aspects of Occupational Medicine Practice (Adul Bandhukul) Workers' Compensation Schemes (Paul Cullinan) Rehabilitation and Return to Work (Nerys Williams) Prevention of Occupational Diseases (David Koh and Aw Tar Ching) Readership: Serves as a useful guide for all those who are interested in occupational medical practice. These include medical students at various levels, occupational health nurses, general practitioners, researchers or colleagues and professionals in occupational and public health and safety – in other words, for all who have committed themselves to do the best practice for the health of working people.

Resources for teaching and learning are posted at tinyurl.com/Glanz4e and www.med.upenn.edu/hbhe4. This fourth edition of the classic book, Health Behavior and Health Education: Theory, Research, and Practice provides a comprehensive, highly accessible, and in-depth analysis of health behavior theories that are most relevant to health education. This essential resource includes the most current information on theory, research, and practice at individual, interpersonal, and community and group levels. This edition includes substantial new content on current and emerging theories of health communication, e-health, culturally

diverse communities, health promotion, the impact of stress, the importance of networks and community, social marketing, and evaluation.

The fourth edition of Vis-à-vis continues the excitement of the innovative third edition with an expanded emphasis on the Francophone world in both the print and media supplements. In the textbook, the new Blog section (which appears in the middle of each chapter) features contemporary language and French and Francophone culture presented in the personal blogs of four characters with different Francophone backgrounds, followed by commentaries by French-speakers from all over the world. Blogs, which are online personal journals, have become hugely popular around the world, and particularly in France where there are approximately three million blogs in existence today. Our new Video Program, filmed specifically for this fourth edition of Vis-à-vis, builds on the stories of each character while serving to support and expand upon the linguistic and cultural content of the chapter as a whole. The Bienvenue dans le monde francophone feature that recurs after every four chapters in the textbook has been broadened to include Louisiana, Morocco, Switzerland, and Tahiti. Minor changes have been made to the scope and sequence. The overall goal of the revision remains the same as that of the third edition: to promote a balanced four-skills approach to learning French through a wide variety of listening, speaking, reading, and writing activities, while introducing students to the richness and diversity of the Francophone world. A beautiful new contemporary design gives Vis-à-vis an appealing look, inspired by real-life personal blogs that are unique and visually stunning.

Academic Writing has been widely acclaimed in all its editions as a superb textbook—and an important contribution to the pedagogy of introducing students to the conventions of academic writing. The book seeks to introduce student readers to the lively community of research and writing beyond the classroom, with its complex interactions, values, and goals. It presents writing from a range of disciplines in the humanities, social sciences, and natural sciences, cultivating students' awareness of the subtle differences in genre. The fourth edition has been revised throughout and includes a new chapter on visual rhetoric, a new section on the academic peer review system, updated examples, expanded exercises, and new glossary entries.
