Hitachi SLIDE COMPOUND SAW C8FB2 Spare Parts - Ryobi

I know of three parts that control the brake on a Hitachi C8FB Slide Compound Saw. They would be the 998-839 Switch. The 999-043 Brushes, if they are too short the brake will not work as it should. Or it could be the 340-108G Stator Assembly, the small brake windings maybe shorted or

Trying to troubleshoot and fix a nonworking C8FB2 8-1/2? Sliding Compound Miter Saw, the first tool of its kind, made in 1988 by Hitachi. It needs carbon brushes, but it won't turn on at all, and nothing seems wrong with the cord or the trigger. The owner's manual and parts list are no help. A lot of the parts are obsolete.

Re: Hitachi C8FB2 8.5" sliding mitre saw? Thanks, I bought the saw I was considering. It was an C8FB first generation slider. I learned a bit for folks searching in the future. The Hitachi saw was the first slider it seems. I found out it uses an 8 1/2" blade that are not as easy to find cheap as an 8 1/4".
