Some people choose to set them in concrete, however others argue that setting them in concrete will make them more prone to rot than if they were set in gravel, sand or the soil they are to be set in. Make sure they are straight and level (it is never good to have crooked corner posts!), before installing the top post connecting all three sunken posts. Fill in the space around the three posts with the soil that was dug out, gravel, sand, or concrete if you so choose.
