Properties Of Matter 4th Grade

One clue to help us identify matter is magnetism. Magnetism is the ability of a material to be attracted by a magnet.

Access Free Properties Of Matter 4th Grade

Only certain materials are attracted to magnets, like iron, nickel, and cobalt. Another property that can help us identify matter is solubility. Solubility describes how well a substance can be dissolved. Some substances, like salt, are easily dissolved by water but not easily dissolved by other liquids, like acetone.
