Siemens rates the S7-300 as a medium level PLC, and the S7-400 as a high-level PLC. So there are differences in work memory, processor speed, number of communication links and I/O connectivity. First point, the S7-400 family is rack-based (Multi-pin backplane linking all modules, from power supply to I/Os) whereas the S7-300 is a bus-linked platform (a serial connector links all modules).
