every chromosome is a sequence of some values. Values can be anything connected to the problem, such as (real) numbers, chars or any objects.

## **Encoding**

The process of video encoding is dictated by video codecs, or video compression standards. What are codecs? Video codecs are video compression standards done

## Where To Download Video Encoding By The

through software or hardware applications.

Each codec is comprised of an encoder, to compress the video, and a decoder, to recreate an approximate of the video for playback.

### **What is Video Encoding? Codecs and Compression**

This number is normally set to correspond to ten seconds (i.e. ten times

# Where To Download Video Encoding By The

the video's (average) frame rate) - a value selected to give a reasonable compromise between the ability to seek in the video and file size.

This value can be computed from times.txt as  $(\text{number of lines} - 1) * 10000 / (\text{last timecode})$ , rounded to the nearest integer. For a more usable video, you can decrease this value; do not increase it past this
