With Shaking Hands Aging With Parkinsons Disease In ...

My hands don't usually shake, but when I'm eating and I raise my hand even a bit, it starts to shake. This is a problem when I'm for example eating at university with my friends. I usually lower my head a bit and steady

my left hand (holding the fork) with my right hand by touching the fork with the knife. And when I'm drinking something, I have to steady the glass with my other hand.

Is it normal my hand shakes while eating? | Is It Normal ...

Shaking and tremors When your body is subjected to stress, it goes into fight-or-flight mode. Stress hormones flood your body and speed up your heart rate, blood pressure, and your breathing. Your...
