Opel Z22SE engine instruction video

The GM Ecotec engine, also known by its codename L850, is a family of all-aluminium inline-four engines, displacing between 1.4 and 2.5 litres. While these engines were based on the GM Family II engine, the architecture was substantially re-engineered for the new Ecotec application produced since 2000. This engine family replaced the GM

An engine wastes fuel energy in several ways, and most of them are due to the laws of thermodynamics, which is another way of saying you can't do much about it. But up to 6% of engine output is lost due to oil drag, made up of pumping losses and viscous drag between moving components. The transmission is included in this.

Alfa Romeo modernized this engine by fitting it with variable valve timing and direct fuel injection called "Jet Thrust Stoichiometric". The problem here is that GM's Z22SE engines had a bad reputation for snapping timing chains. Vauxhall/Opel improved that engine in 2002 by updating the oil feed nozzle that lubricates the timing chains.
